Turn SAP Business One data into aha moments!

Data is the heart of every business. It guides decision-making, keeps teams on track, and fosters innovation. Yet companies often find it challenging to efficiently share data with all lines of business.

That's where SXP Employee Edition comes in.

Access and explore SAP Business One data with ease.

SXP Employee Edition is a browser-based portal solution for securely accessing, exploring, and analysing SAP Business One data in real-time.

Mobile-friendly and accessible via any standard web browser, SXP empowers teams to work from any device, anywhere.

With its native SAP Business One integration and out-of-the-box dashboards and reports, teams will get up and running quickly for a predictable monthly cost.

What can you achieve with SXP Employee Edition?

Democratise report creation

Give users the ability to customise existing queries and save them as their own, reducing the dependence on IT for custom reports.

Drive new levels of efficiency

Add interactive elements like forms and scheduling apps to any web portal.

Make data-driven decisions

Decision-making requires you to look at data in different ways. Easy-to-use pivot tables, drill-downs, and colourful charts make it easy to get the insights you need for clear decision-making.

Reduce the need for ERP licenses

Give staff access to the data they need via a single web-based dashboard instead of logging into SAP Business One.

Boost productivity

On-demand access to the tools and data they need empowers teams to move business forwards without obstacles or delays.

Key features

- ✓ Real-time integration with SAP Business One
- ✓ Easily configured within SAP Business One
- ✓ Hosted in AWS Cloud
- ✓ Out-of-the-box dashboards and reports
- ✓ Microsoft 365 single sign-on (SSO)
- ✓ Drag-and-drop columns, dynamic pivot-style tables, and powerful filtering
- ✓ Mobile-friendly browser interface
- ✓ Supports multiple languages
- ✓ Customisable to your brand
- ✓ Advanced security and permission settings

Enrich your portals with SXP apps.

EMPLOYEE SALES APP

Easily manage daily sales activities, such as lead creation and pipeline management, from your web browser.

PRODUCTION SCHEDULER APP

Schedule, manage, and sync SAP Business One production orders from your browser.

EXTENSIBILITY APP

Build integrated, customisable forms and tabular-style grids that capture, display, and update ERP data in real-time.

EMPLOYEE SALES APP

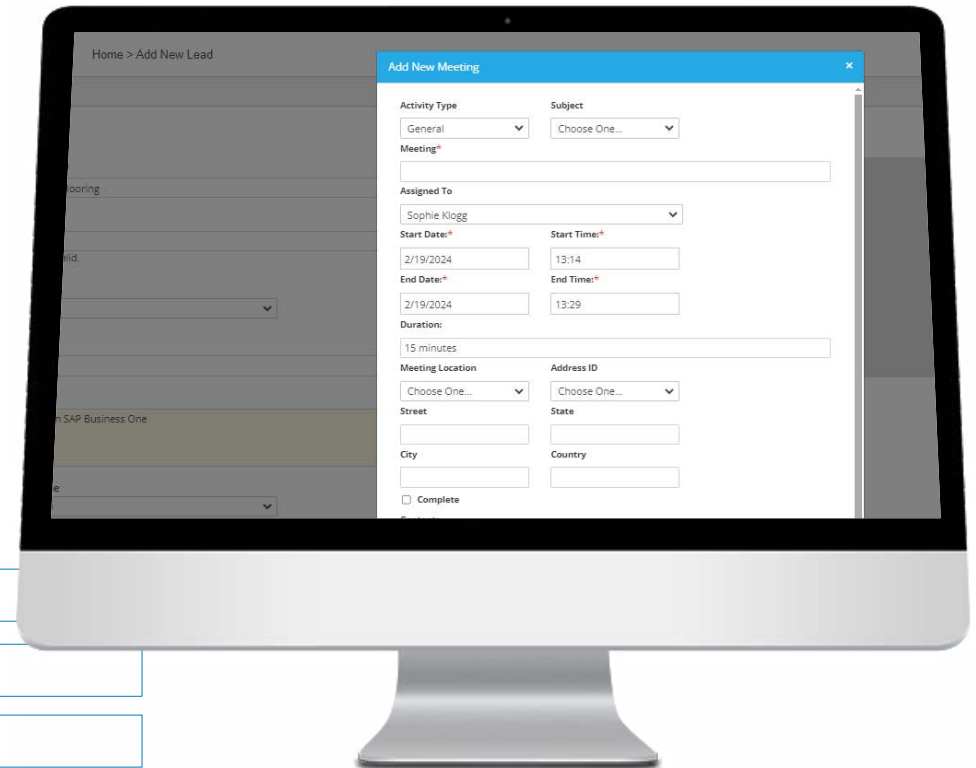

Easily manage pipeline and perform sales tasks from a browser.

At their best, your salespeople are selling, closing deals, placing orders, and serving customers in the field.

What if there were an easier, faster way for them to manage that activity and have more time to sell?

The SXP Employee Sales app empowers teams to manage daily sales activities in real-time from their web browser, whether in the office or on the go.

- ✓ Manage pipeline with drag-and-drop ease
- ✓ Prepare and submit sales quotes and orders
- ✓ Input and manage lead and customer data
- ✓ Customise sales reports and dashboards to monitor performance
- ✓ Capture delivery signatures
- ✓ Manage tasks, schedule meetings, and attach documents and notes

PRODUCTION SCHEDULER APP

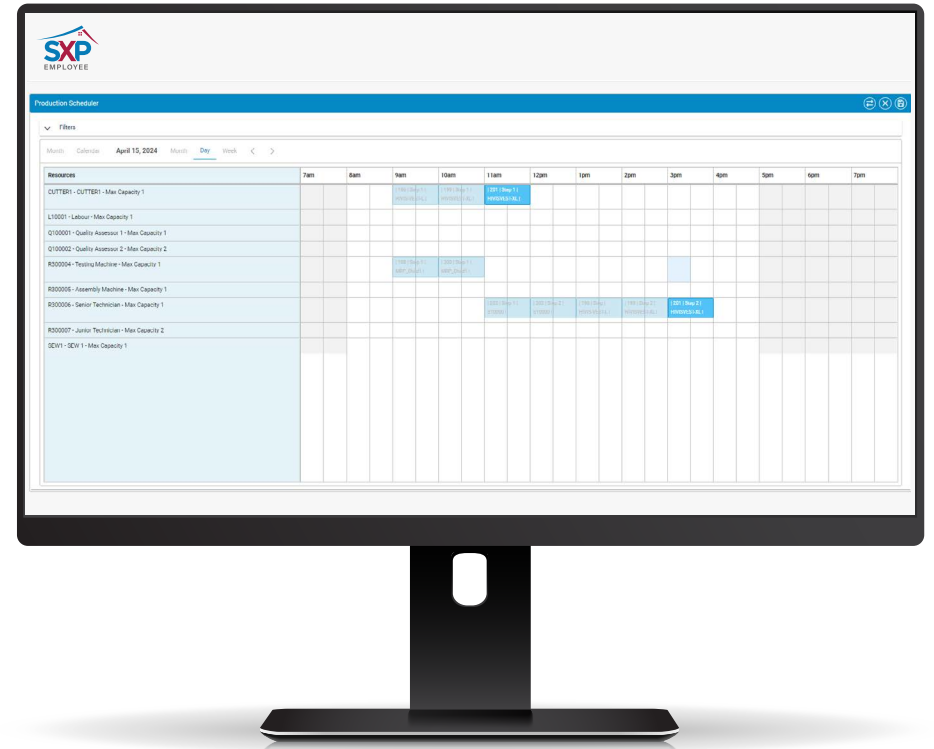

Schedule, manage, and sync SAP Business One production orders from your browser.

Production is the lifeblood of your business.

But when production schedules are managed inefficiently—typically with spreadsheets—operating costs increase, resource productivity decreases, and delivery dates slip.

You can avoid those problems with SXP's Production Scheduler app.

The Production Scheduler app helps manufacturers running SAP Business One optimise production resources and deliver goods on time by enabling the production manager to schedule and manage production orders from a web browser.

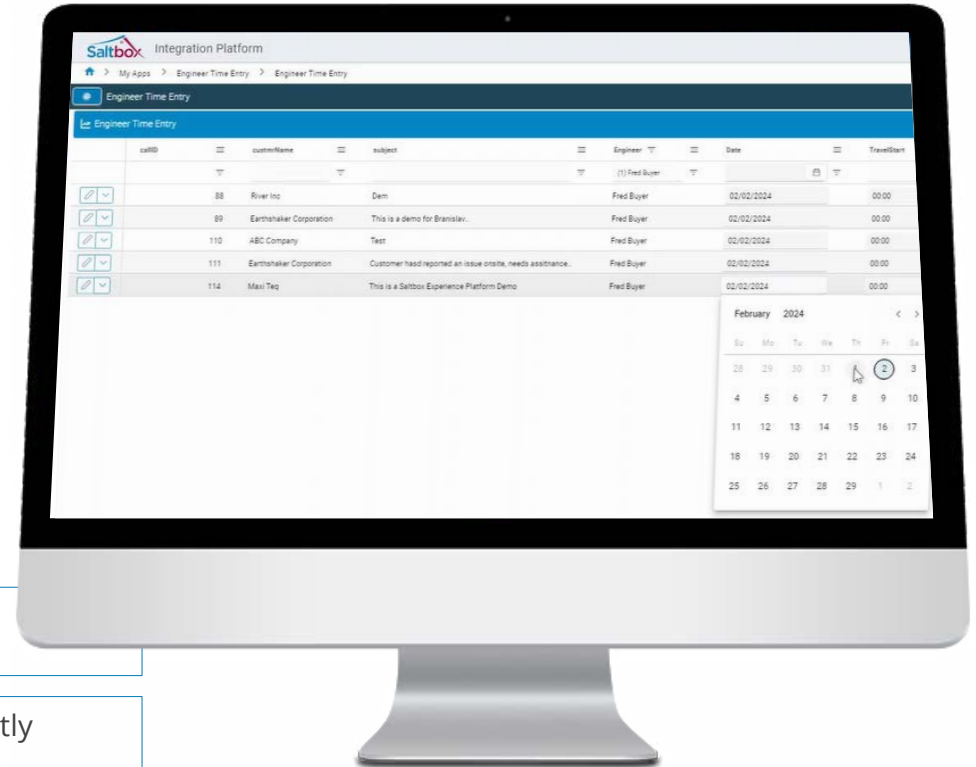

- ✓ Schedule, manage, and sync SAP Business One production orders from your browser
- ✓ Quickly access daily, weekly, or monthly calendar views of the production schedule
- ✓ Reschedule orders and tasks with dependencies with a simple drag and drop
- ✓ Issue goods
- ✓ Automate processes, including backflushing, closing production orders, and receiving finished goods

EXTENSIBILITY APP

Leverage the power of Saltbox to add sophisticated capabilities to any web portal.

The **Extensibility app** enables you to add interactive forms, tabular-style grids, and nested grids that capture and present data, automate processes, and write data back to SAP Business One in real-time. Examples include time sheets, updated inventory levels from the warehouse floor, completed service tickets, and so much more.

- ✓ Create custom apps to capture, view, and edit data & save it back to SAP Business One (or other systems)
- ✓ Build interactive forms, and grids that enable end users to directly capture, view, and edit system data from their browser
- ✓ Integrate and present data from one or more business systems (e.g., an ERP solution or accounting system)
- ✓ Embed apps into SXP web portals
- ✓ Leverage Saltbox workflows to automate business processes

About Vision33

Vision33 solves business challenges through the promise of technology and the value it delivers.

Historically focused on reselling and deploying ERP solutions for small and mid-market companies, we've developed a modern suite of cloud solutions that extends the value of business systems, including SAP Business One, SAP Business ByDesign, and Sage Intacct.

Our integration, automation, and interactive web portal technologies help customers achieve peak operational efficiency and continuous growth.

We look forward to exploring digital transformation opportunities with you!
